

# Community of Interest Survey

Community Name: Bay Facing Coast with Sea Level Rise Risk

Use the same Community Name if you are submitting a map online at <https://SmcDistrictLines.org/draw-a-map>

## 1. What is your Community of Interest?

Describe your community's shared culture, interest, activity, business or other bond.

The communities on the coast of the Bay share in many challenges. We all face sea level rise.

Sea level rise is most at risk East of 101 but more importantly East of the Railroad Tracks. We also sit under SFO's landing strip meaning we are impacted disproportionately by sound.

## 2. Where is your Community of Interest?

Explain the geographic boundaries of your community of interest. What are the physical boundaries? Include any key landmarks such as parks, county facilities, schools, church, or other boundaries.

East of 101. I think Redwood Shores North but perhaps only Foster City. Follow the Bay Trail.

We all use the same recreation space along the bay trail. Foster City is cut off from High Schools and at least one High School should be in FC's COI which should be San Mateo.

## 3. How is your Community of Interest Impacted?

Describe how your community is affected by policy decisions made by the Board of Supervisors. (County services include housing, healthcare, elections, parks and recreation, child welfare, and public benefits).

The Board is responsible for coordinating cross city sea level rise. A proverbial leak in the levee will affect all of us, water doesn't recognize computer drawn lines on a street. It only knows flat vs hill.

There is also a much higher renter population East of 101 as a % of population vs the Hills.

## Optional Information:

Name: Evan Adams

Email: .

Which District do you live in?  District 1  District 2  District 3  District 4  District 5

If you're not sure, look up your district at: <https://bos.smcgov.org>

Can we contact you with additional redistricting information?  Yes  No
